Our Factory

Our products are held to the highest quality levels. We use only high carbon materials and modern technology procedures for processing. Our popular WithArmour knives are first Wire cut (EDM) with machines, then pass through vacuum heat treatment, are processed by digitally controlled grinding machines or CNC milling machines, then PVD vacuum coating machines and even more-- all to create the best product available.

WithArmour. Passion run in the families

A young blacksmith & art apprentice named **Bing Zheng** (center old gentleman) was looking for a better technologies to keep blade sharp longer and design attractive knives. His unique approach produced the first Knife in 1962 in Yangjiang Knives Manufactory of Chinese Military. **Bing** designed and made each knife by hand under his own intelligence, using worn-out file blades as raw material. His handiwork was greatly appreciated in Military Knives Industry in China.

As China open to the world in 1980, government limited military factories, **Bing** began his own factory with his eldest son **Xiao Zheng** in 1985 had located in Yangdong Guangdong for OEM knives Industry, making knives for Buck, SOG, Boker, CRKT, Kershaw knives. His daughter **Annie Zheng** and son in law **Davis Zhang** built another knives factory with **Bing** for Balisong knives in 1995 and setup brand WithArmour for EDC and TACTICAL Series Knives in 2010 until now.

Commitment to Innovation

Our Managers take great pride and focus on the WithArmour brand with each and every knife. Every project is handled with the utmost care and consideration throughout the manufacturing process. They treat the product as if it were being made for them and they want to ensure the best quality for the customer.

Our Design Studio

Our design team is aggressive and proactive in developing the best designed knives possible that are in high demand by consumers.

Our on-site studio of professional knife designers work tirelessly to bring their concepts to life, and create fully-functional tools for the real world. We also work closely with other designers from around the globe, in America, Europe, and Russia. We understand that design is the seed for the future.
